Phenol [108-95-2], compounds

Specific coordination compounds containing the phenoxy ligand are indexed only at the coordination headings, e.g., Tungsten, trifluorotriphenoxy-, (OC-6-21)- [60103-00-6]. Non-specific coordination compounds containing this ligand are indexed here and at the element headings. Specific coordination compounds containing other ligands derived from phenol, e.g., the neutral ligand, are indexed here as well as at the specific coordination headings

Phenol [108-95-2], esters

Specific esters of acids with phenol are indexed under the names of the acids only. General studies of phenol esters are indexed at this heading

Phenol [108-95-2], polymers

Dimers and other so-called polymers of phenol that are formed exclusively by intermolecular association are indexed at other subdivisions of the Phenol heading
